Figma, FigJam, AI-Assisted Coding (Figsite, Chatgpt, Google Antigravity) AI Design Tools, Google Workspace.

EXPERIENCE

Product Designer | Consultant SWYCHR Tech Africa Oct 2025 - PRESENT

- Simplified complex fintech workflows by eliminating major friction points in the SWYCHR app, significantly improving task completion rates.
- Conducted research that uncovered overlooked user needs, shaping product decisions and increasing feature adoption.
- Improved retention by redesigning core experience flows, enabling a smoother product journey.
- Accelerated development cycles by building scalable UI components and functional prototypes using AI tools, aligning the product with growth targets

Product Designer | UX Researcher NuraKicks Ecoms Ai Sept 2025 - Nov 2025

- Designed an AI-driven e-commerce experience focused on improving product discovery and building user trust in automated recommendations.
- Reduced user drop-off by 33% by identifying onboarding gaps through user research and implementing a new activation flow.
- Refined navigation, search, and checkout experiences to drive stronger repeat purchase behavior.
- Developed a lean design system that improved consistency and accelerated future UI updates.

Graphics Designer | Brand Strategist Starr Power Technology USA Aug 2022 - Feb 2025

- Improved interface clarity on internal tools and marketing pages, helping users process complex information faster.
- Strengthened digital presence with a unified visual identity that improved brand consistency by 25%.
- Collaborated with product teams to provide early UI direction and user-centered design practices.
- Created visual assets that boosted engagement across web and social, improving communication and brand recall.
